confect of the Baltimore Sea, in describbe rest to a ten garden situated about fifty and growing as fine as any I ever saw in China or area. The hunter were very vigorous, but the second of trimming the who they otherwise would it properly pruned.

I who they otherwise would it properly pruned, one of the family, who had used the crudest modes speaking and marking, and to my surprise the teams many fair indust. I am quite convinced that the moderate amount of care, with no more skill very fine, lending to the interest and solemnity of the services that peculiar charin which good music and the services before the young always produces, and making the occasion one of "I told you so" neighbors trumpeted "failure;" "California wont grow tea." Let this narrative correct the false impression.—[Corr. Pacific Rural Press.

#### NOTES OF THE WEEK

Her Majesty Queen Kapiolani and suite sailed for Lahaina, Maul, in the steamer Likelike

SUDDEN DEATH .- We learn that Dr. Smyth, a practising physician of Hito, Hawall, died anddenly at the above place on the 8th inst. particulars as to the cause of his death.

The schooner Warwick which left this port n Saturday evening lest, destined for Kalaupapa, Molokai, was in consequence of apringing a lesk when abreast of Diamond Head, compelled to return to Honolula. The steamer Australia sailed last night at 12

clock, taking some thirty-six passengers, and a good freight. Among the former were several sour-old resicents, Mrs. W. H. Wilder, J. Campbe and wife, E. Fursiensu and J. Woods BENEFIT.-Mesers, James Luproll and L. Dear will be the recipients of a complimentary benefit on

Saturday evening next, at the Theatre, tendered to sion a varied and entertaining programme will

The lecture at the Lyceum on Thursday evening, by Prot. W. D. Alexander, on the Agri-Do I Charmy Bosserie and Sign are leading with dis- culture of Palestine, was well attended, and the andience was highly delighted with the interesting descriptions given by the lecturer. We regret that we were prevented from attending the lecture by circumstances beyond our control, for we know we were deprived of a treat which we would have

Laine & Co .- We call particular attention to the advertisement of the above firm to another column, on the subject of feed for horses and milch cows. This is important to all classes and should be takes advantage of. Laine & Co have provided themselves with all the necessary facilities to accommo-date the public with feed for their horses and cows, and will keep on hand a constant supply to accommodate their customers.

Hotel street, will accept the thanks of the emplovees in the Gazette Office, for his generous donation of Hot Cross Buns on Good Friday morning. We are glad to learn that Mr. H. had a large sale of his delicious bons, as a reward for his enter-prise in notifying the public through the medium of the newscapers as well as by hand bills. Mr. H., like all good business men, knows the value of ad-

Mr. S. Magnin at the Great Eastern dry goods emporium, No. 63 Fort street, has made a great reduction in former prices on articles comprising his large and well-selected stock of goods Purchasers by examining his published schedule of prices—which will be found in his advertisement in another column—will be convinced that his is the cheapest place to buy, and as "economy is the road to wealth," will do well in practicing it by

Good Friday was observed very generally in this city. All business at the Government departments was suspended, the flags at the different consulates and on board the shipping in the harbor were displayed at half-mast, and religious services were held in the Episcopal and Roman Catholic cathedrals The atmost propriety of conduct on the part of the citizens, strangers and sojourners was observed throughout the day, a fact which we are pleased to record.

The P.M.S. Company's steamship Alaska left this port on Saturday evening, at about 6 o'clock. en route for Yokohama. It will be remembered that the Alaska put into this port two weeks ago for repairs, she having sustained damage on her voyage from San Francisco. The repairs to the Alaska were done by Messrs. Tibbet & Sorenson, ship-builders of this city. The Alaeks, after dis-charging passengers at Tokohama, will proceed to Hougkong, and then return to San Francisco via Houghout.

On Saturday evening last the Honolulu Reading Rooms and Library Association held a seeting, at which it was determined to apply for a charter of incorporation as soon as the necessary arrangements can be made for that purpose. There was a large attendance at the meeting and the proceedings were very harmonious. The association is progressing very well thus far, and all that is necessary to make it a complete success is the support and sympathy of a generous public, which we

CHARLES T. GULICE, Esq.-This gentleman has opened an office in the building at the corner of Kashumanu and Queen streets, for the transaction of a general business, such as the settlement of merchants' and townsmen's books, mak-The Washest Form per Likelike, April 13-HRH ing collections, drawing instruments of writing such as deeds, mortgages, articles of agreement, etc., etc. The well-known qualifications of Mr. Gulick for the transaction of business, his familiarity with the native language, and his long experience in the Interior Department of the Government, gives him peculiar facilities in the way of a general cierical business, and we trust that he will receive the patronage of the public in his new enterprise. Mr. Gulick is kind, courteous and gentlemanly in his intercourse with his fellow men, which are qualities not possessed by everybody.

Mn. EDITOR.—Sir: I was not a little surprised to see a statement in one of your late issues, to the effect, "that no one knew the cause of the late Mr. Akona's death." You certainly most have had little or no information in the matter, as I have known deceased for some time, and most thorough in own deceased for some time, and most incough-ily understood his case, as well as the immediate cause of desth, which I fully explained to his fam-ily and certified to when called upon by the proper authorities. I thought first not to notice the mat-ter, but many who knew the circumstances pressed me to call for an explanation, which I have no doubt, in justice to myself and for the benefit of those misinformed, you will willingly give in your next publication. Respectfully Yours,

F. LESLIE MINEU, M. D.

Honolulu, April 10th, 1879.

We confess we do not understand what Dr. Miner means by asking from us an explanation. If he means that we shall state what he told us about the 10th inst., the date of his note, namely, that Akona died of an inordinate use of ardent spirits, we can only say that was the first time we knew the cause of his death, as up to that time we did not even know Akona had a physician. We made all the inquiry at the house of the decessed for information, but could obtain none, and bence we said no one knew the cause of his death. We might as well say that we think there is a disposition some-where to make a mountain out of a mole hill in Akona's case.

Rain, Rain, -Our advices from the Windward islands for the past week are to the effect, that rain has tallen in unusual quantities. On Mani, in the neighborhood of Makawoa, it has rained almost incessantly for the past two weeks. In the locality The Walsoner mountains are almost bare and the just named the rain has been so constant that all outdoor work was suspended. In this same locality last year there was a severe drought, but this year is making up for the deficiencies of the past. From The law of aroon will not allow a all sections we have the gratifying intelligence that crop of 1879 will be very large on all the islands. In all directions the mills are running night and

> EASTER PRAISE SERVICE AT THE FORT STREET CHURCH, EPISCOPAL AND CATHOLIC CATHEDRALS. -On Sunday evening last there was held in the Fort Street Church the Easter Praise Service, in remembrance of the crucifizion and resurrection of the Saviour of mankind. The church had been previously beautifully and artistically decorated with floral emblems which gave fine effect to the interesting scepe. On the face or front of the large organ was a beautifully constructed white cross trimmed with green leaves, the front of the chole gallery, the pulpit, and on each side in rear of the pulpit were appropriate floral emblems, giving to the whole picture the finest effect. We have seldom seen floral decorations in a church so exquisitely displayed as on this occasion, which reflects great credit on the taste of those who superintended the arrangement. The services throughout were very interesting and appropriate to the solemn occasion. The audience chamber of the church was crowded to excess by an attentive multitude. The services consisted of a brief address from the pastor the Rev. W. Frear, singing by the choir, and the reading of appropriate passages of scripture by mem-

bers of the congregation according to a pre-

arranged programme. The music by the choir was

Episcopal and Catholic cathedrals the decoration were, like those in the Fort Street Church, tastefu and beautiful, and the services highly interesting

and appropriate. The music was excellent throughout at the Episcopal cathedral; the singing of that
beautiful and popular Sunday School hymn "Onward Curistian Soldier" was especially fine. We
regret we could not visit the above pisces of
worship in person, but we had representatives there
from whom we received reports to enable us to
mention them though briefly. Easter Sunday
was observed with Christian devotion, we might
say enthusiasm to Honoluin, thus evineing say enthusiasm to Honolulu, thus evincing the presence of a true Christian spirit in the heart

the presence of a true Christian spirit in the hearts of the people and betokening the fact that the work of those engaged in spreading the gospel and religious influences among the people of these Islands is not labor in valu. As we sat listening to the exercises we felt all the force of the beautiful sentiment of the sacred poet in his invocation to the Holy Spirit, when he wrote:—

"Spirit, when as wrote."
"Spirit divine attend our prayer,
And make our hearts Thy home,
Descend with all Thy sacred power,
Come Holy Spirit come.
Come as the wind with rushing sound,
With Penticostal grace,
And make Thy great saivation known,
Wide as the human race."

In a word, no one present at the praise service on Sunday evening could help but feel that it was good to be there on such a solemn occasion

LAVA FLOW AT KILAUEA, AND SHOCK OF EARTH QUARE AT KAU.-We learn by letter dated Volcano House, March 27th, 1879, that the Volcano of Kilauen was sending forth a lave flow of unusual volume, which is described as tollows: "There was a large lava flow just to lecward of the cruter. A river of running lava of about a mile and a quarter long by three quarters of a mile wide. Looking towards it was a grand sight. The lawa seemed to run to sea at the rate of about half a mile an hour. There is scarcely any fire in any part of the crater except where the lawa is flowing from, and it is still running. It it runs much longer there will be There was some fire on the top of Mannalos about two weeks ago, and all the people in Kau expect a lava-flow down there sooner or later. They had a shock of earthquake at Kau about a week ago, and the people there are keeping a sharp lookout for what may come." From the foregoing t would seem there are apprehensions of stirring times in the neighborhood of the crater of Klinuca and Maunaloa, and we would not be surprised to learn at any moment of volcanic action of unusual violence. It is some years since there was any great out-pouring at Kilauca and Maunaloa, and it but natural that there should be a demonstration of nature at intervals, as heretofore are looked for by the natives and seem to o

### News Items.

Hornible Munder by a Sysp Morner.—On March 6th, the wife of a laborer named Deaten was arrested at Manchester, Kentucky, U. S., for breaking the skull of her step-daughter, then breaking the girl's neck by hoisting the body by a rope to a beam in an out-house, and then carrying the dead body to a field for a vicious horse to kick.

LORD CLEMENSFORD .- The rumor that Lord Clemensford was removed from command in South Africa, terms out not to be correct, and that he will not be removed, inasmuch as the Government has full confidence in his fitness for the command in Zululand.

The new Russian cruiser Zabraka, built at Phila-delphia for the Russian government, made a success-ful trial trip down the Delaware river on the 7th of March last. She is said to be the fastest cruis-A Vienna dispatch says : The Russian Governmen

has discovered a plot for forcibly liberating the im-prisoned nihilists, and has proof of the revolutionary designs of the prisoners. A special from Berlin mentions dissensions b

tween the Cnar and Cnarovitch. Burmah has had some experience of late in the way of a revolution, which has been confined to a few of the royal family, which has been rather severe upon some of them. In October last the King died. Before his death some twenty or thirty of the royal princes had been immured in dungeons and leaded with chairs. Since the death of the King the loaded with chains. Since the death of the King th imprisoned princes have all been put out of the way, in other words, have been put to death, and thus the line of succession materially thinned. Great Britain may, and most likely will, think that this state of things calls for a little discipline a la Zulu.

Little has been said of late regarding the tunnel between France and England, but preparations for the work continue. Seven thousand five hundred and seventy—one soundings have taken place within 500 feet of the French coast, with a view of ascertaining the form and geological nature of the ground and 3,267 specimens have been obtained. Similar condings have also taken place on the English dispenses have also taken place on the English dispenses. soundings have also taken place on the English side, BAILBOAD ACCIDENTS .- The Railroad Gazette in a recent issue gives the number of railroad train acci dents occurring in every month from 1872 to 1878 both inclusive. In 1873, the number was 1,283; in 1874, 980; in 1875, 1,201; in 1876, 982; in 1877, 981; in 1878, 740. In the same years the number of killed and wounded by railroad accidents or trains was as follows: Killed—in 1873, 276; in 1874, 204; in 1875, 234; in 1876, 228; in 1877, 214; in 1878, 204. Injured—in 1873, 1,172; in 1874, 778; in 1875, 1,107; in 1876, 1.097; in 1877, 1,047; in 1878, 766. The Tariffville, Mary's Junction, and Wolle rs are accountable for one-fourth of the killed and 28 per cent of the injured the past year. Of the 740 accidents the past year, 481 resulted from derailment, and misplaced switches is the greatest cause of derailment, so that there is an apparent remedy for accidents from this source.

THE BANK OF ENGLAND .- This is a venerable inatitution, which may be said to have become a part of the English Government itself, and which is certainly the pendulum to the financial machinery of that nation. On the coming 27th of July the Bank of England will be 185 years old. It was projected by William Patterson, a Scotchman. Its history in brief, since that date, as outlined by an English paper, is this :

Constituted a joint stock company, with a capital of £1,200,000, the whole sum was lent at interest to the Government of William and Mary, then much embarrassed. At the outset it was a servant of the State, and has ever since continued such more or less. The charter, granted at first for eleven years, has been from time to time renewed, the last renewal has been from time to time received, the last renewal subject to modification or revocation, having been in 1844. For a while the business was done in one room; now the Bank occupies a large building in Threadneedle Street, and employs some 800 men. Nothing less than a £5 note is ever issued, and co note is issued a second time. The average amount of notes in circulation is £25,000,000.

THE WOOL PRODUCT OF THE WORLD .- AD American paper estimates the number of sheep in the world at from 484,000,000 to 600,000,000, of which the United States has about 36,000,000, and Great Britain the same number. From 1801 to 1875, the wool-clip of Great Britain and Ireland increased from 94,000,000 to 325,000,000 pounds. That of France has increased almost as rapidly, although the wool is finer, as a rule, and hence the superiority of French cloths. Australia produces nearly as much wool as the parent country, Great Britain. The United States product has increased from very little at the beginning of the present century to about 200,-000,000 pounds at the present time. Of this Califor-nia has produced about one-fourth, and the Pacific Coast as a whole almost one third. The wool-cip of Australia is about 284,000,000 pounds; that of Buenos Ayres and the River Plats, 222,500,000 pounds; other countries not previously given, 463,-000,000 pounds. The total clip of the world last year was about 1,497,500,000 pounds, worth \$150,-000,000. This when scoured would yield about \$52,000,000 pounds of clean wool.—Polytechnic Re-

THE VOTE AGAINST IMPEACEMENT .- An analysis of the role in the French Chamber against impeach-ment shows IS3 Republicans and 134 Legitimists and Bonapartists. The vote for impeachment stood 168 Republicans and I Bonapartist. The Ministry has a majority of 25 of the Republicans, and on this point the support of nearly the whole body of the Legitimists and Bonapartists. The situation is not Legitimiets and Bonapartists. The situation is not satisfactory, as it is easily within the power of the Right to join the extreme Left, and precipitate measures which the Ministry will not be responsible for. The latest reports from Paris are that material changes will be made in the Cabinet, including the witffurnwal of Waddington from the Premiership.

General Grast is India.—General Grant was to be at Calcetta on the 10th of March. He left Bombay on the 18th of February. He seems to have spent some time at Bombay as the guest of the Viseroy and other distinguished English officials. He also had an opportunity at a banquet of making the acquaintance of a number of Parsee gentlemen and native merchants. As Bombay is on the eastern or European shore of British India, and Calcutts on the western or Pacific shore, the General had spent only twenty days in passing through India. His next movement was to be Madras and Ceylon.

The CULTURE IN California.—Herr Schooll, with his twenty-two Japanese people, proved, in coitivating over a militon of plants, and it making some tea therefrom, that the tea plant finds every favorable condition of soil and climate along the whole line of the Nevada foot-hills. His experiment whole line of the Nevada foot-hills. His experiment was a success agriculturally, as recorded to the transactions of our Agricultural Society. He made a small box of tex to satisfy friends; and though the plants were not ripe for plucking and firing, the beverage was like Japan tex in fishor. An unlooked for casualty destroyed his tex plants when in full vigor of growth. This swamped him funancially, and beyond recovery. The casualty, which cannot occur again, was in this wise: Summer irrigation is required, and he used the miner's water from the public range. The water was allowed to be in contact with the plants. All mine water holds iron and suphur in suspension. The growing plants having affinity for those elements, a ring was precipitated around each plant near the ground, thus was every plant

## Late Foreign News.

London, March 28.—A morning paper states that peace negotiations with Yakoob Knan bave tailed, and that an immediate advance of the British troops upon Kabul will take place. Melbourne, March 29.—Parliament has been further prorogued until May 23d, but it is consid-ered improbable that the meeting will take place

The Afghanistan war is not settled, but the Brit-

h forces were at the last advices making a for-ard movement. From the colonies there is not anything of any cial interest. By our advices next week from the States we expect a large budget of news from all

The New Zealand Herald of the Sist of March gives an account of a harricane that passed over the group of the Friendly Island, on the 6th of March. The harricane prostrated churches, native houses, cocoanut trees and everything in its path, and lasted for about thirty-six hours. At Tonga the natives thought the end of the world had come, as they pover experienced such a terrific hurricans The news was brought by the German was ship Albatross. The hurricane was very destruc-tive at Samoa, and fears are entertuined of fearful disasters to shipping, as it would be almost impos-sible for any ship to live through such a fearful hur-

A BERLIN RESTAURANT.—The proprietor of a popular restaurant in Berlin has instituted what he calls the Dinner of the Golden Sausage, the great attraction of which is the insertion in every thirtieth sausage designed for his guests of a small gold coin, which becomes the property of the individual to whose lot it chances to fall. It is quite a study to observe the guests seated round the numerous tables, each accommodating thirty persons, all of whom are moving their jaws most cautiously. Of those favored by fortune some are unable to concent their satisfafrom their mouths to their pockets. As a matter of course, every one is obliged to masticate his food slowly, instead of bolting it in the national fashion, otherwise the tiny golden coin might slip down his guilet unawares.—[New York Sun.

THE PLAGUE STAYED'-General Melikoff may be premature in reporting the pestilence in Astrakan as entirely stayed, but it has been so far checked as to have greatly relieved European apprehensions. This has been owing to the prompt and vigorous measures taken by Russia to narrow the boundaries of its ex-istence. It would hardly be possible for the plague istence. It would hardly be possible for the plague in this age of medical progress to commit those wide apread and fearful devastations of the earlier centu ries. Still, the ravages were severe for a season. About 5,000 deaths were reported in the infected districts in a population of 118,000.

# THE UNDERSIGNED

VIV SOLE AGENTS FOR THE BAIN WAGON For this Kingdom, and are prepared to furnish any size, the carrying capacity varying from 1,200 to 7,500 pounds. We have imported quite a number of these Wagous for funitation use during the past year, and they prove to be just the wagon to suit the requirements of our planters. We have now in stock some of these wagons, with 1% inch Iros Axies. Will carry from 4,000 to 4,500 pounds. Prices Low.

### DILLINGH AM & CO. ELECTRIC LIGHT

THE ELECTRIC LIGHT VS. GAS COMPANIES.—The announcement that Mr. Edison has discovered a means for dividing the electric current indefinitely, thereby making it possible to use electricity fighting small areas, has had a marvelous effect in bringing down the value of gas stocks. The stock of the Chartered Gas Company of London, for example, has been depreciated in the market between five and ten million dollars, if we may trust a statement made before a recent meeting of the company. At an auction sale of gas stock in New York city on the 16th of last October, shares of the New York Gaslight Company, that on September 11th last, brought 91%, sold for 78%. Shares of the Manhattan Company that sold for 200% in September went for 149%. Whether this enormous falling off in value in six weeks is to be charged entirely to the fear of electric competion does not ap-pear; but evidently the larger part of it is, for a similar decline is noticeable in other places.

For further particulars concerning Mr. Edison's won-derful invention, we refer you to the Scientific American of March 2, 1878.

As we are not yet quite prepared to furnish our cus-tomers with the "Electric Coil" in quantities to suit, we offer in its stead the next best thing. 1000 CASES ELECTRIC OIL

Just received ex Martha Davis, direct from Boston which we will sell to consumers by the single case at This splended oil has been tested by our Government authorities, and we guarantee it to be fully up to the test of 10%, 742 lm
